HABAWHAT??

HABADEX

- Replace your Rolodex™
- Speed Dial your Telephone
- Keep Your Daily Calendar
- Write Letters, Memos, Reports
- And More...

HABAWHAT??

HABADEX A unique, powerful, versatile new kind of application software designed to help you better manage your time, your telephone, your personal files, and your business, from the keyboard of an Apple III computer.

It's as simple as that.

What can it do?

All this, and more:

- **Puts Files at Your Fingertips—**
Keeps track of up to 6000 names, addresses, phone numbers and other important reference information, and retrieves them at the touch of a key.
- **Speed Dials Your Telephone—**
Finds numbers for names in your files, dials them, automatically inserts OCC numbers (e.g. SPRINT, MCI) and codes—all to help streamline your phone work.
- **Tracks Telephone Costs and Billing—**
Whether you dial the phone yourself, or let Habadex dial for you, the cost of each call is automatically calculated, stored, billed to a specific account, even recalculated according to your business surcharges—and then printed out at your convenience, for complete phone cost management.

- **Provides Daily, Monthly Schedules—**
A calendar gives you a month at a glance; zoom in on individual days for complete appointment schedules. Even reminds you of upcoming appointments throughout the day.
- **Prints Reports and Memos—**
With a powerful report generation package, you can do mailing lists, multiple memos and letters, even work compatibly with Apple Writer™.
- **Manages Your Other Software—**
The Habadex system also includes HABANET, a comprehensive program management system that enables you to load all your application software packages (VISICALC™, Apple Writer™, Great Plains Accounting™, etc.) onto a hard disk, and then access them from a main menu quickly and conveniently.

System Requirements

An Apple III computer with 256K

A Profile or other hard disk

Monitor

Printer (optional)

The complete Habadex system consists of software and a HABAPHONE plug-in interface card. You may purchase the software without the card, but you won't be able to take advantage of the exclusive Habadex telephone dialing and accounting features.
